Re: POWER SURGE CONTROL

Please consider this to be a testimonial letter regarding our use of your Transient Suppressor over the last year. Prior to the installation of your units in our main Administration building, our electrical consumption was right at 34680 KWH per month. Now, one year later, our electrical use is 27699 KWH per month.

The drop in power use has been consistent. We have neither deleted any systems during this period nor have we reduced any use of the facilities.

Based on quality and performance, your units have done more than we expected and we would not hesitate to recommend its use to anyone.

Sincerely,

A handwritten signature in cursive script, appearing to read "Fred Dumpel".

Fred Dumpel
Plant Engineer
