

LAURENTIENNE
GÉNÉRALE

Following these mishaps, we have installed surge suppressors at the electrical panels on the 16, 17, 18, 25 and 26th floors. Since the installation of the surge suppressors, we have not experienced these kinds of costly disaster and loss of productivity.

Since the installation of surge suppressors in our agents offices we have eliminated all service calls due to electrical disturbances.

In fact, we received almost five (5) calls a day from our sixty (60) offices to solve or attempt a solution to this type of problem. Considering that each call takes one hour of our technician time, we can now confirm that our savings represent \$250.00 a day in time and effort.
